## HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

**DETAILED ACTION**  
***EXAMINER'S AMENDMENT***

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Dan Marks on February 4, 2010.

The application has been amended as follows:

**In the CLAIMS**

**Claim 29:** replace claim 29 with new claim 29 below.

**Claim 29.** A method of playing a slot machine game on a computer-based slot machine having at least a processing unit and a display device, the slot machine game using a symbol matrix formed by a plurality of rows intersecting with a plurality of columns, with the plurality of rows and columns including a plurality of symbols, comprising:

- a) a player making a wager to play the game via a wager input device of the computer-based slot machine;
- b) the processing unit randomly rearranging the plurality of symbols;
- c) displaying the rearranged symbols in the symbol matrix on the display device;
- d) the processing unit automatically expanding wildcard symbols, if displayed in the symbol matrix, such that each wildcard symbol:
  - i) expands by simultaneously occupying two or more positions in the symbol matrix; and

- ii) expands in all possible directions assigned by directional indicia displayed on said wildcard symbol;
- e) the processing unit always replacing each symbol in the path of an expanding wildcard symbol with the expanding wildcard symbol;
- f) the processing unit evaluating winning symbol combinations formed using expanded wildcard symbols, wherein each said wildcard symbol may act as any other symbol of the plurality of symbols in order to form a winning symbol combination; and
- g) the processing unit issuing awards for winning symbol combinations following the expansion of all wildcard symbols.

#### ***REASONS FOR ALLOWANCE***

Claims 29, 30, & 32 are allowed.

The following is an examiner's statement of reasons for allowance: A thorough search for prior art fails to disclose any reference or references, which taken alone or in combination, teach or suggest, in combination with the other limitations, "the processing unit automatically expanding wildcard symbols, if displayed in the symbol matrix, such that each wildcard symbol: i) expands by simultaneously occupying two or more positions in the symbol matrix; and ii) expands in all possible directions assigned by directional indicia displayed on said wildcard symbol".

The closest prior art is one of Bennet (U.S. Patent No. 6,585,264), O'Halloran (U.S. Patent No. 6,439,993), or Gauselmann (U.S. PgPub No. 2002/0052233). Bennett discloses a an expanding wildcard symbol, however, the symbol appears to only move in one of multiple directions associated with the indicia displayed on the wildcard symbol, such that the disclosure explicitly discusses that the gaming device will randomly select one of the possible directions, but will not expand in all possible directions.

Moreover, the indicia displayed on the each wildcard symbol is not specifically directional indicia, but rather, chess pieces for instance, which have associated possible paths, however the indicia itself does not appear to indicate such paths. O'Halloran appears to select an expanding wildcard configuration based on the position in which the wildcard symbol is displayed on a particular pay line, and does not appear to expand any wildcard symbols simultaneously in all possible directions as required by the claimed invention. Also, similarly to Bennett, O'Halloran lacks any directional indicia that dictate the paths possible to travel for the expanding wildcard symbols. Lastly, Gauselmann discloses a method of modifying adjacent symbols to special symbols, thus expanding the special symbol into the adjacent symbols, however such a process is not based on directions associated with the indicia displayed on the wildcard symbol. Gauselmann appears to fail to teach or make obvious the claimed invention for at least the same reasons as discussed above with O'Halloran. It appears directional indicia is more than a mere ornamentation of indicia, as it has a direct impact on the how the wildcard symbol will expand, thus, merely expanding wildcard symbols that move to adjacent positions, such as in O'Halloran or Gauselmann, lacks an explicit teaching or motivation to extend such expanding from some adjacent positions to all possible directions and all symbols in those directions as explicitly indicated on said wildcard symbol by directional indicia. For at least these reasons, claims 29, 30, & 32 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
